LIMITED WARRANTY AUTO AND LIGHT TRUCK (EXCLUDES UNSTEEL RADIAL LIGHT TRUCK) HIGHWAY TIRE ADJUSTMENT POLICY

ELIGIBILITY

You are eligible for the benefits of this policy if you are the owner or authorized agent of the owner of new Goodyear highway auto and light truck tires (including mud and snow and on/off-road tires, but excluding Unisteel radial light truck tires, motorcycle, antique, and classic tires) bearing Department of Transportation prescribed tire identification numbers, and if your tires have been used only on the vehicle on which they were originally installed according to the vehicle manufacturer's or Goodyear's recommendations. Light truck tires are defined as all tires identified with the "LT" designation in the sidewall stamping plus the 8-19.5 and 8R19.5 sizes which do not carry the "LT" designation.

COVERAGE (REPLACEMENT FREE) RADIAL AUTO AND RADIAL LIGHT TRUCK TIRES

Any new Goodyear highway radial auto tire or radial light truck tire, except Unisteel radial light truck tires, covered by this policy, that does not deliver satisfactory highway service due to a workmanship or material-related condition (see Adjustment Policy Limitations) during the first 25% of useable treadwear, or twelve months from date of purchase, whichever comes first, will be replaced with a comparable new Goodyear tire without charge. Mounting and balancing are included. The mounting and balancing provision for Light Truck tires, included in the free replacement portion of this warranty, is effective with tires purchased or produced January 1, 1989 (019) or later. If proof of purchase date is not available, tires manufactured January 1, 1989 or later are covered.

ALL OTHER HIGHWAY TIRES

Any new Goodyear highway auto or light truck tire, other than radial auto, radial light truck, or Unisteel radial light truck tire, that does not deliver satisfactory highway service, due to a workmanship or material-related condition (see Adjustment Policy Limitations), during the first 10% of useable treadwear will be replaced with a comparable new Goodyear tire without charge. Mounting and balancing are included. The mounting and balancing provision for Light Truck tires, included in the free replacement portion of this warranty, is effective with tires purchased or produced January 1, 1989 (019) or later. If proof of purchase date is not available, tires manufactured January 1, 1989 or later are covered.

Any Goodyear temporary spare tire that does not deliver satisfactory highway service due to a workmanship or material-related condition during the first 50% of useable tread depth (1/32nd of an inch) will be replaced with a comparable new Goodyear temporary spare tire without charge. Mounting is included. After the first 50% of useable treadwear you pay only an adjustment charge for the treadwear received, plus any mounting charge.

COVERAGE (PRORATED ADJUSTMENT)

Tires not eligible for no charge adjustment that do not deliver satisfactory service due to a workmanship or material-related condition will be

replaced with comparable new Goodyear tires on a pro rata basis. The replacement price will be calculated by multiplying the current Goodyear "predetermined price for adjustment" or current advertised price at adjustment location (whichever is lower) by the percentage of useable original tread that has been worn off at the time of adjustment. You pay for mounting, balancing, and an amount equal to the full current Federal Excise Tax applicable to the comparable new replacement tire.

EXAMPLE: If your disabled tire had an original 8/32nd of useable treadwear and is worn to 4/32nd useable tread remaining, you have used 50% and, therefore, must pay 50% of the predetermined price for adjustment or advertised price of the comparable tire plus an amount equal to the full current Federal Excise Tax applicable to the comparable new replacement tire at time of adjustment. If the price of the new comparable tire is \$80.00 and FET is \$2.00, the cost to you would be \$42.00.

The "predetermined price for adjustment," available at all Goodyear Auto Service Centers and participating dealers, fairly represents the actual regular retail selling price of the comparable tire at the time of adjustment. If a "predetermined price for adjustment" is not available, adjustment will be based on the price at which you are entitled to buy at the time of adjustment.

A tire has delivered its full original tread life and this warranty ends when the treadwear indicators become visible regardless of age or mileage.

DEFINITION OF COMPARABLE TIRE

A "comparable" new Goodyear tire may either be the same line of tire or, in the event the disabled tire is out of production, the same basic construction and quality with different sidewall or tread configuration. If a higher priced tire is accepted as replacement, the difference in price will be additional.

Any tire replacement under this warranty will be covered by the Goodyear warranty in effect at time of replacement.

ADJUSTMENT POLICY LIMITATIONS

This limited warranty is applicable only in the United States and Canada. For countries other than the United States and Canada, consult your local Goodyear dealer or distributor.

No representative or dealer has authority to make any representation, promise, or agreement on behalf of Goodyear, except as stated herein. The following are not covered by this policy:

- Goodyear does not warrant and will not give credit in any adjustment transaction for any kind of material, added to the tire after leaving a Goodyear factory, nor will it adjust any tire which has failed as a result of adding any such material. (Example: The fillers, sealants, or balancing substances.)
- Irregular wear or tire damage due to:
 - Road hazards (including punctures, cuts, snags, impact breaks, etc.)
 - Wreck, collision or fire.
 - Improper inflation, overloading, high speed spinup, misapplication, misuse, negligence, racing, chain damage or improper mounting, or demounting.
 - Mechanical condition of the vehicle.
 - Ride disturbance after the first 25% of useable treadwear or due to damaged wheels or any vehicle condition.

- Temporary spare tires used on vehicles used in racing and on passenger cars in special applications such as police pursuit service
- Any tire intentionally altered after leaving a Goodyear factory to change its appearance. (Example: White inlay on a black tire.)
- Tires with weather cracking which were purchased more than four (4) years prior to presentation for adjustment. If you have no prior or purchase date, tires manufactured four (4) or more years prior to presentation are not covered.
- Loss of time, inconvenience, loss of use of the vehicle, or consequential damage.

Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

Any tire no matter how well-constructed may fail in service or otherwise become unserviceable due to conditions beyond the control of the manufacturer. This warranty is not intended as a representation that a tire failure cannot occur.

OWNER'S OBLIGATIONS

- You must present the tire to be adjusted to a Goodyear Auto Service Center or Goodyear Tire Dealer. (Please consult your telephone directory for locations.) Tires replaced on an adjustment basis become the property of The Goodyear Tire & Rubber Company.
- You must pay for taxes or any additional service you order at the time of adjustment.
- No claim will be recognized unless submitted on a Goodyear claim form (supplied by Goodyear Dealer or Auto Service Center) completely filled out and signed by you, the owner of the tire presented for adjustment or your authorized agent.

TIRE ROTATION

The purpose for regular rotation is to achieve more uniform wear of all tires on the vehicle. The first rotation is the most important. Be it rotating tires, always consult your vehicle owner's manual for recommended rotation patterns and intervals. Tires should be inspected every 6,000 to 8,000 miles (10,000 to 13,000 km) for any signs of unusual wear. If unusual wear is present, rotate your tires as soon possible and check wheel alignment.

LEGAL RIGHTS

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

SAFETY WARNING

- Serious injury may result from:
- The failure due to underinflation/overloading—follow owner's manual or tire placard in vehicle.
 - Explosion of tire/firm assembly due to improper mounting—only specially trained persons should mount tires.
- Radial tires must be mounted on approved rims.

TIRE SPINNING

CAUTION:

On slippery surfaces such as snow, mud, ice, etc., do not spin tires in excess of 35 MPH as indicated on the speedometer. Personal injury and severe damage may result from excessive wheel spinning, including tire disintegration or axle failure.
