

Quick Start Guide **FUEL STATION**

Follow these steps:

- 1.) Locate the fuel station control panel, dispensing hose and nozzle on the exterior of your RV / trailer:
 - After being **INACTIVE**, the control panel will be in **Sleep/Locked Mode**
 - Lights on the control panel are not lit up (sleep mode).
 - ON/OFF buttons are **not** functional.

- 2.) **WAKE** control panel, press "ON" or "OFF" button.
 - Control panel will display fuel level(s).
 - RV's equipped with two tanks will display both fuel station and generator tank levels.
- 3.) **UNLOCK** control panel, hold "OFF" button down until "ON" button begins to **blink**.
- 4.) Press "ON" button to activate pump, dispense fuel.
 - Use Hose and Nozzle to dispense fuel.
- 5.) When finished refueling, press "OFF" button.
 - Pump will automatically go into reverse mode for 10 seconds returning undispensed fuel in dispensing hose and nozzle to the tank.
- 6.) Control panel will revert to **Sleep/Locked Mode** after 2 minutes of inactivity.
