QUICK START GUIDE: Super SolarFlex
Getting Started with Solar

1. OEM & Super SolarFlex Battery Disconnect into the "On" position
Battery heat and disconnect switch can be found by remote center.

2. If you're NOT plugged into Shore Power, turn on inverter using the Magnum ME-RC.

3. Download the VictronConnect App
Turn on bluetooth to connect with products. Pair all products with app and then select your BMV-712. Confirm settings.

App Store	Google Play	User Manual

Default pin code is 000000. After connecting, the pin code can be changed by going into "Settings" (upper right), select "Menu" (⋮), "Product Info", and here you can change the product name and pin code.

Battery settings	
Battery capacity	510Ah
Charged voltage	14.3V
Discharge floor	20%
Tail current	4.00%
Charged detection time	3m
Peukert exponent	1.05
Charge efficiency factor	99%
Current threshold	0.10A
Time-to-go averaging period	3m
Battery starts synchronized — Battery SOC after a reset will be 100%	
State-of-Charge — Manually set the current state-of-charge	94.8%
Synchronize SOC to 100%	SYNCHRONIZE
Zero current calibration	CALIBRATE
